Marine conservation organizations have joined together to offer a special Ocean Awareness training on O`ahu. Don't miss your chance to take part in this course, which will provide multi-disciplinary knowledge of Hawai'i's unique marine environment.

Participants will learn about current ocean conservation efforts and opportunities to get involved. The program is recommended for those employed or volunteering in the fields of marine education or recreation, or those interested in doing so. Instructors include university scientists, government agency staff, environmental educators, and conservation practitioners.

Participants are required to take part in all four sessions, and a three-hour field project in order to receive C.O.R.A.L. certification (Care of our Culture, Oceans, Reefs and Animal Life). Training topics include marine ecology of the Hawaiian Islands, protected species, threats to coastal and marine environments, and marine life identification.

This is the fourth time this popular program has been offered on O`ahu and it is expected to fill quickly. **The registration fee for the 2009 training is \$20.00.**

Sign up now to learn more about the marine species that call Hawai'i home and find out how you can become more involved in supporting local marine conservation and stewardship efforts. **Register today by visiting us online at <http://oceanawarehawaii.org> or by calling 397-2651 ext. 249.**
